## Air-Flex

The Air-Flex is an electric adjustable-height treatment table designed to make flexion-distraction easier than ever before. Its truly unique design offers a height range from 21.5" to 29" (or 22 1/2" to 30") with air-powered flexion and distraction. Air-thoracic breakaway and pneumatic drops are optional. The air features on the table are supplied by a self-contained pneumatic system. Both the air-compressor and the electric elevation systems are safely enclosed within the telescoping base. Add Auto-Flexion for even greater versatility and Auto-Distraction for Decompression-Traction.

### Specifications & Features

- Standard 24" width
- Height from 21.5" to 29" (22.5" - 30" Upon request)
- Includes tilting headpiece and thoracic release
- Air distraction and flexion.
- Height controlled by electric foot pedal
- Rotation, lateral motion, and locking mechanisms
- Slide-out ankle support
- Beige or gray acrylic thermo-plastic base
- One-year warranty on all parts.

Part #	Price
BAHILAR HA90C	Starting at \$5,585

## Air Drop

If you have used a manual drop table for any length of time, then you'll appreciate the impressive speed and ease of treating with the Air-Drop HA90C. Equipped with the Hill Air-Drop System, the HA90C allows doctors to select one or up to four drops simultaneously from the convenient, side-mounted, control panel. Once a section has been dropped, it is instantly reset with the simple touch of a foot pedal.

### Specifications & Features

- standard width - 24", length - 6'3"
- electrically controlled height - 23 1/2" to 33" (low height available - 21 1/2")
- tilting headpiece
- air-dual drop forward and straight-motion headpiece
- air-thoracic drop & breakaway
- air-lumbar drop
- air-pelvic drop
- drop-away foot
- rocker foot pedal
- air-powered foot control from foot end
- foam top - 2 1/2"
- arm rests, 13" face cut-out, and paper roll
- beige or gray acrylic thermo-plastic base
- one-year warranty on all parts

Part #	Price
BAHILAD HA90C	Starting at \$6,500

## Anatomotor

The Anatomotor has been a trusted leader among traction-massage treatment tables for nearly 60 years. Amazingly versatile, the Anatomotor is designed for soft-tissue massage, intermittent and constant traction, heat and vibration.

The Anatomotor has a moving top on which the patient glides back and forth just under the normal respiration rate. During this movement, two sets of adjustable-height massage rollers straddle the spine and rhythmically loosen taut muscles. This deep-kneading massage effectively prepares the patient for traction which actually separates the spinal vertebrae.

### Specifications & Features

- the anatomotor is designed for soft-tissue massage, intermittent and constant traction, heat and vibration.
- the anatomotor is available in fixed heights from 22" to 32"
- all anatomotors come with a one-year warranty on all parts

Part #	Price

### SI Belt

The Serola Sacroiliac Belt is designed to compress and support the sacroiliac joints, thereby relieving stress and instability at these weight bearing structures. Just as importantly, it is not so tight that it is restrictive. Excess or insufficient motion can adversely affect the entire musculoskeletal system. The Serola Sacroiliac Belt, by providing the correct balance of resistance and resilience, re-establishes the joint's normal motion.

Part #		Price
ASC074S	Small (up to 34")	\$40
ASC074	Medium (34"-40")	\$40
MKSBL	Large (40"-46")	\$40
